- Approval of minutes from the February Minutes

### ■ Treasurer report:

JCPL electric bills paid on \_\_\_\_\_ for your approval: \_\_\_\_\_ total

Provident Bank active account: \$

Provident Bank inactive account:\$

■ The replacement benches are expected to be delivered this month, March, and at that point DPW will initiate the assembly process and placement. Below is a engineering drawing of the area to be involved. Anthony will contact Commission members when this is going to occur, if anyone is looking to attend and be present.

### ■ Bench Replacements

**January 20<sup>th</sup>** – Good morning Anthony-

I wanted to let you know that we received word that the benches will be delivered within the next 6 weeks. I would suggest that the commission moves forward with the ordering of the plaques.

I will be having the engineer go onsite and discuss with DPW the placement of the benches as well.

### ■ Repair of the bridge between Bradley and Ocean Grove

Mikaitis, Dana 7:48 AM (36 minutes ago)

Good Morning,

DPW will be repairing the footbridge in April, weathering permitting. We will be using treated wood and our goal is to have it completed within a month. Biagio apologizes for the delay in this information but he wanted to speak to the individuals that will be working on the project so that he could provide you with the most accurate information.

Have a great day!

Dana M. Mikaitis, Secretary

Bradley Beach DPW

(732) 776-2999 ext. 3101

The material will be treated wood, which will be waterproofed next year.

■ **Installation of cameras for the bridge:** Captain Lenny said that with respect to a camera for the bridge, he is 99% sure that there is a space on the monitoring screen, they have a license for it, and that it would only involve purchase and installation of a camera. No monthly charges. the town (DPW) could install.

■ **Bridge Lighting**

Biagio Cofone provided me with some information on the bridge lighting possibility.

There are LED lights that are cost-effective to run, but the installation will be approximately \$2,700. Bradley does not have the budget for this project. We are seeing if it can be shared by Bradley Beach, Neptune and the FLC.

■ **Coordinating the Wildlife Control**

January 27<sup>th</sup> - Kim Humphrey & Stephen Toth

Contacted Stephen Toth by email and phone: egg addling will begin most likely early April.
