

## Resource Documentation

FEMA is committed to providing local officials and their communities with outreach materials regarding Advisory Base Flood Elevations (ABFEs). Below is a list of current resources to use when communicating flood risk regarding near-term Hurricane Sandy rebuilding efforts.

During community meetings with FEMA officials you will also see an “Outreach Menu” of additional items to choose from. As those become available this document will be migrated to the [www.Region2Coastal.com](http://www.Region2Coastal.com) website.

Working together, we can create stronger and safer communities that are less vulnerable to future flooding.
