

# Press Release: Wesley Lake Commission

Neptune- The Wesley Lake Commission invites all citizens and visitors to enjoy the natural beauty and recreational activities surrounding our Lakes.

The Wesley Lake Commission is responsible for the maintenance and improvement of the lake.

Our initiatives have included pond weed control and the placement of aerators to increase the oxygen in the Lake which improves the health of the aquatic habitat.

As summer approaches please keep in mind that improving and preserving the health of the lakes and their aesthetic appeal will take every one of us! Please take pride in these valuable assets to our community by:

- Not feeding the wildlife- It risks the spread of disease, threatens the health of the birds, jeopardizes the safety of the birds and endangers drinking water supplies
- Disposing of all garbage in the receptacle Everything on the ground is swept into the lakes and then the Ocean when it rains.

- Pick up visible trash left by others-especially cigarette butts!

- Pick up after your pet-Animal waste adds nitrogen to the water which depletes the oxygen in water necessary for beneficial underwater grasses, wildlife and fish. Animal waste may contain harmful organisms such as Giardia, Salmonella and E. coli that can be transmitted to humans and other animals by ingesting contaminated water. Roundworms and hookworms deposited by infected animals can live in the soil for long periods of time and be transmitted to other animals and humans. It's the law! Neptune and Asbury Park require you to pick up after your pet.

Enjoy your summer! Enjoy our beautiful city and support it by keeping our lakes clean!
