Tech Review with Deborah Osepchuk and Jeffery Rudell

Nagle. Door, Lights, Windows. Shore Point proposes replaced windows, and doors, and removing one window currently screened from view by an outdoor shower. Although the applicant provided a survey of all the windows (with photos) a site inspection is required by Jenny and Joe to determine the condition of these existing windows and doors, whether they are original, and we also need cat/cuts of proposed replacement doors and windows and lighting (lighting is not indicated on either the drawing or the narrative). **Pending.**
